Python (pandas)
Power BI
Excel
A/B testing
Statistics

Education

B.Sc. Statistics
Christ University, 2023
CGPA 8.4 / 10

Profile

Data analyst with 2 years in retail and fintech. SQL, Python and Power BI; turns messy sales data into weekly decisions.

Experience

Data Analyst, Kirana Mart (fictional)

Jul 2024 - Present

- Built a Power BI sales dashboard used by 40 store managers every Monday.
- Cut the weekly reporting run from 6 hours to 45 minutes with SQL views.
- Found a 12% stock-out pattern in 3 regions; reorder rules changed within a month.

Analyst Intern, PaySetu (fictional)

Jan 2024 - Jun 2024

- Cleaned 1.2 million UPI transaction rows in Python (pandas) for a fraud review.
- Wrote 15 SQL checks that now run nightly on the payments warehouse.

Projects

- Swiggy-style delivery time model: predicted delays within 6 minutes on a public dataset.
